

Tänker att det kunde vara intressant att ändra från .csv fil till excel fil och se om det ser annorlunda ut när man öppnar den i olika program

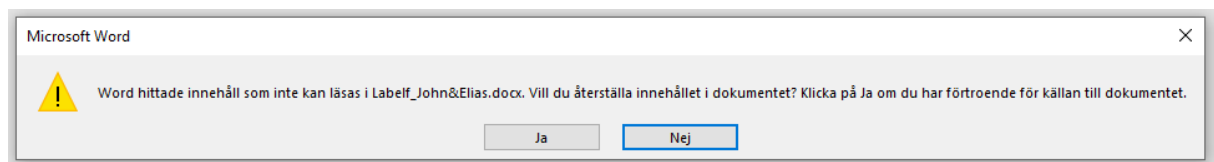

Hur ser den ut än så länge?

23	22,My motor won't work,Fredrik,Ticket Category?,Fitting Issue,2.0,label							

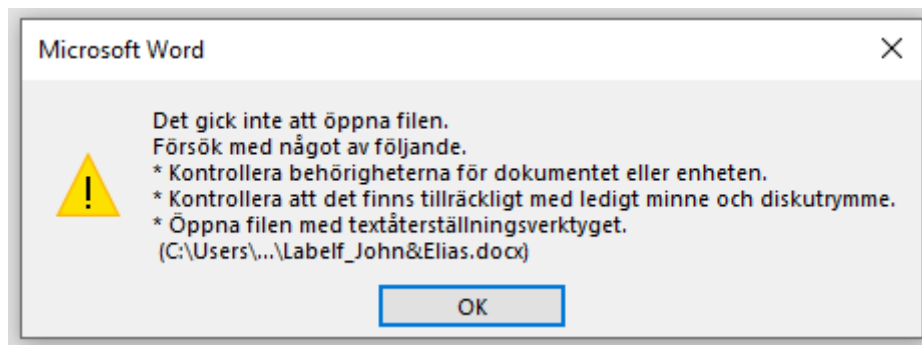

Pga att den är öppnad via excel när datan är optimerat för att bli öppnad med Google Drive's respektive variant, så är det inte helt förvirrande varför dens format ser extremt dåligt ut

Nu, tid för att ändra om formatet till ett word dokument

Och redan, har vi mött ett problem

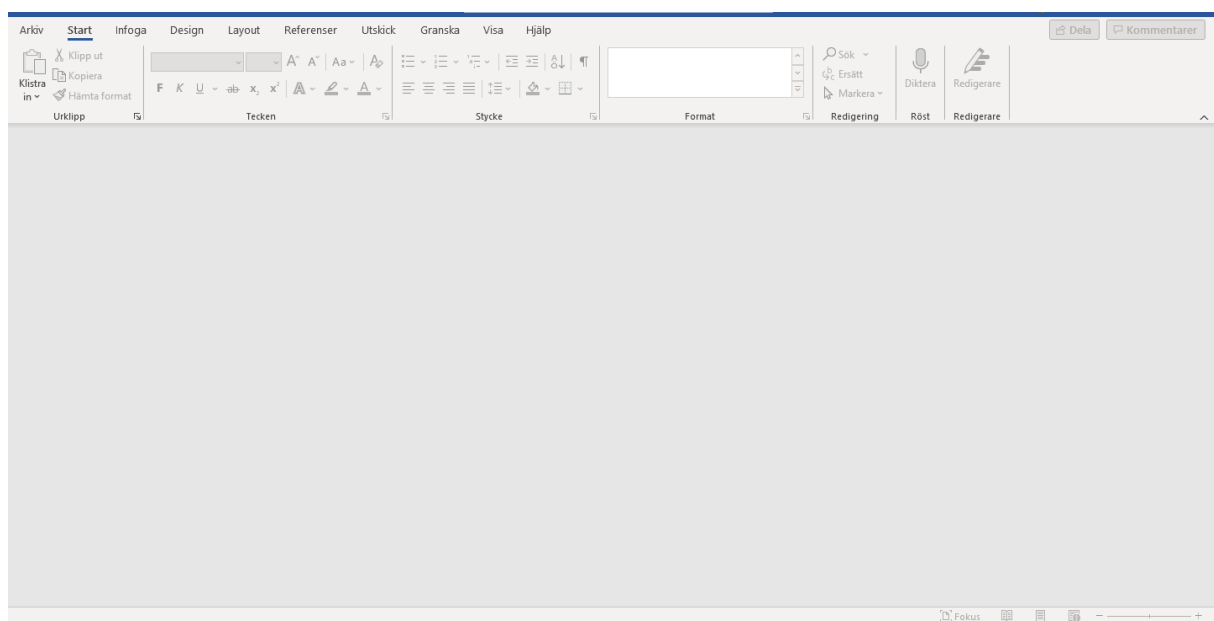

Förstörd, så vi trycker på "ja" för att vi litar på källan.

Filen funkar inte att öppna.

När man kommer förbi det

Inget existerar. Så från mitt test, så funkar det inte att ändra om filen till en Word fil.

Så om man ändrar filen istället från docx till .txt

```

```

Så börjar det funka, såklart så hanterar inte .txt tabeller, men i alla fall fungerar det.
